2 emissions in the United States The commercial and residential building sector accounts for 39% of carbon dioxide (CO₂) emissions in the United States per year, more than any other sector. U.S. buildings alone are responsible for more CO₂ emissions annually than those of any other country except China.

Buildings Account for 39% of CO₂ emissions in the United

U.S. LUMBER is the leading distributor of specialty building materials in the Southeast and Mid-Atlantic United States. Our customer base consists of 3,500 local lumber yards and building supply dealers who serve the professional remodelers and home builders in their communities.

U.S. LUMBER : Specialty Building Materials Distributor

based on Titsch's 1965 definition, in which a building is a simplicial complex with certain properties. It is possible to give a more modern answer to "What is a building?", which is equivalent but looks very different; see [2]. Buildings are made up of apartments, also called thin buildings or Coxeter complexes; these correspond to Coxeter groups.
