The presence of leukocytes within tumors, observed in the 19th century by Rudolf Virchow, provided the first indication of a possible link between inflammation and cancer. Yet, it is only during the last decade that clear evidence has been obtained that inflammation plays a critical role in tumorigenesis, and some of the underlying molecular mechanisms have been elucidated (Karin, 2006).

January 2015â€”Dark matter is shrinkingâ€”at least in the thyroid cancer part of the universe. Until recently, the percentage of papillary thyroid carcinomas with no known oncogenic drivers hovered around 25 percent. Now, with the publication of the most recent research effort by The Cancer Genome Atlas project, that number has shrunk considerably, to about 3.5 percent.
