Unasylva: Forests in the Climate Change Agenda. No. 246

Attribution of recent climate change is the effort to scientifically ascertain mechanisms responsible for recent climate changes on Earth, commonly known as 'global warming'.The effort has focused on changes observed during the period of instrumental temperature record, particularly in the last 50 years.This is the period when human activity has grown fastest and observations of the atmosphere ...

Attribution of recent climate change - Wikipedia

Climate change feedback is important in the understanding of global warming because feedback processes may amplify or diminish the effect of each climate forcing, and so play an important part in determining the climate sensitivity and future climate state. Feedback in general is the process in which changing one quantity changes a second quantity, and the change in the second quantity in turn ...

Climate change feedback - Wikipedia

This page introduces what climate change is, the potential impacts and resistance to the otherwise accepted understanding that it is man-made climate change.

Introduction. Over the past few years, the focus moved from the question "Is climate changing?" to the equally important question: "Can society manage unavoidable changes and avoid unmanageable changes?" 225, 191 Research demonstrates that both mitigation (efforts to reduce future climate changes) and adaptation (efforts to reduce the vulnerability of society to climate change impacts ...

Adaptation | National Climate Assessment

A group of geologists have drawn my attention to the 2010/2013 Geological Society of London's statement on climate change and asked if I could arrange an on-line discussion about it. The lead author of the statements is Dr Colin Summerhayes who has participated as guest blogger and commenter on Energy Matters before. And so I asked if I could reproduce the statements on these pages and ...

The Geological Society of London's Statement on Climate

The credit of any victory rest largely on the shoulders of passionate Greenpeace volunteers, donors, activists, water protectors, pipeline fighters, petition-signers, protesters, Congress callers, plastic clean-up and brand auditors, supermarket plastic campaigners, and social-media messengers " all of whom joined us in this extraordinary time to affect change for our environment.

Greenpeace USA

Developing countries face a difficult challenge in meeting the growing demands for food, water, and energy, which is further compounded by climate change. Effective adaptation to change requires the efficient use of land, water, energy, and other vital resources, and coordinated efforts to minimize ...
