when the camera is vibrating and produces a strange wobbling effect. Skew: similar to wobble, this happens when the camera or subject move from one side to another, creating a skewed image. Smear: this occurs when an object is moving at the same, or near to, the speed that frame is read by the camera.

Zoom compacts are pretty similar to standard compact camera, but usually benefit from a more powerful zoom lens (which can be as high as 30x). These cameras tend to be a little more robust and are generally larger in size than standard compacts. Most would have some manual exposure options, as well as automatic, and usually offer HD video recording.
