Images are everywhere on computers. Some are obvious, like photos on web pages and icons on buttons, but others are more subtle: a font is really a collection of images of characters, and a fax machine is really a computer that is good at scanning and printing.

## **Image Representation - Computer Science Unplugged**

Published as a conference paper at ICLR 2015 Table 1: ConvNet configurations (shown in columns). The depth of the configurations increases from the left (A) to the right (E), as more layers are added (the added layers are shown in bold).

Notes - Computer Hardware Basics The Computer A computer is made up of many parts: 1. Input/Output (I/O) devices " These allow you to send information to the computer or get information from the computer.

## **01 Notes - Computer #11DFA8 - Garfield Computer Science**

Computing is any activity that uses computers. It includes developing hardware and software, and using computers to manage and process information, communicate and entertain. Computing is a critically important, integral component of modern industrial technology. Major computing disciplines include computer engineering, software engineering, computer science, information systems, and information ...

2 - Holland Code This is based on r. John Holland's theory that people and work environments can be loosely classified into six different groups.

### **Includes Holland Code. The Six Holland Types - WIU**

A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.
