Sleeping patterns of horses in selected local horse

Horse behavior is best understood from the view that horses are prey animals with a well-developed fight-or-flight response, but can act like predators to defend their territory or herd, as when chasing or biting weaker horses, ponies, mules, small animals or people in their way. A horse's first reaction to a sudden threat is often to flee (known as "spooking"), to run for a short distance and ...

Horse behavior - Wikipedia

Helpful / interesting for horse owners, who can use this both to generally understand their horses' behavior and also to understand the impacts of care practices at home and at boarding barns. Useful also for veterinarians and farriers to help them understand more about the behaviors of the horses they work to help.

Understanding Your Horse's Behavior - ACES.edu

Stereotypic behaviour is an abnormal behaviour frequently seen in laboratory primates. It is considered an indication of poor psychological well-being in these animals. As it is seen in captive animals but not in wild animals, attention has been focused on the situations in which this behaviour develops.
