a) Structure Q H F K 5 V n The Similitude Concept states that if the nominal stress histories in the structure and in the test specimen are the same, then the fatigue response in each case will also be the same and can be described by the generic S-N curve.

Use of fracture mechanics in fatigue crack growth and damage tolerant design requires knowledge of pre-existing cracks, either assumed or found using nondestructive flaw detection techniques (reviewed in Chapter 2). Fracture mechanics has been used heavily in the
