An operating system (OS) is system software that manages computer hardware and software resources and provides common services for computer programs.. Time-sharing operating systems schedule tasks for efficient use of the system and may also include accounting software for cost allocation of processor time, mass storage, printing, and other resources.. For hardware functions such as input and ...

Operating system - Wikipedia

The kernel is a computer program that is the core of a computer's operating system, with complete control over everything in the system. On most systems, it is one of the first programs loaded on start-up (after the bootloader).It handles the rest of start-up as well as input/output requests from software, translating them into data-processing instructions for the central processing unit.
