Optimization applications can be found in almost all areas of engineering. Typical problems in chemical engineering arise in process design, process control, model development, process identification, and real-time optimization.

### **Chapter 1 Introduction to Process Optimization**

Optimization of Chemical Processes (cont.) Optimal operating conditions can be implemented via increased automation at the process, plant, and company levels (eg, Model Predictive Control) To apply optimization effectively in the chemical industries, both the theory and practice of optimization must be understood.
