

passive and active measurement pdf

Helicases are a class of enzymes vital to all living organisms. Their main function is to unpackage an organism's genes. They are motor proteins that move directionally along a nucleic acid phosphodiester backbone, separating two annealed nucleic acid strands (i.e., DNA, RNA, or RNA-DNA hybrid) using energy derived from ATP hydrolysis. There are many helicases resulting from the great variety of ...

Sonar (originally an acronym for sound navigation ranging) is a technique that uses sound propagation (usually underwater, as in submarine navigation) to navigate, communicate with or detect objects on or under the surface of the water, such as other vessels. Two types of technology share the name "sonar": passive sonar is essentially listening for the sound made by vessels; active sonar is ...

Measurement and Instrumentation: Theory and Application

Groove geometry vs. frequency \propto The amplitude of the signal produced by moving a magnetic field through a coil is proportional to the velocity of the motion \propto To get the same amplitude out of a phono cartridge at all frequencies, the groove would need to be very wide at low frequencies, and very tiny at high frequencies
