Semantic networks. Lexical semantics also explores whether the meaning of a lexical unit is established by looking at its neighbourhood in the semantic net, (words it occurs with in natural sentences), or whether the meaning is already locally contained in the lexical unit.. In English, WordNet is an example of a semantic network. It contains English words that are grouped into synsets.

Linguistics. In linguistics, semantics is the subfield that is devoted to the study of meaning, as inherent at the levels of words, phrases, sentences, and larger units of discourse (termed texts, or narratives).The study of semantics is also closely linked to the subjects of representation, reference and denotation. The basic study of semantics is oriented to the examination of the meaning of ...
