Ecology (from Greek: ἔκος, "house", or "environment"; -λογία, "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...

## **Ecology - Wikipedia**

Human ecology is an interdisciplinary and transdisciplinary study of the relationship between humans and their natural, social, and built environments. The philosophy and study of human ecology has a diffuse history with advancements in ecology, geography, sociology, psychology, anthropology, zoology, epidemiology, public health, and home economics, among others.

At the time of writing, post-processing of the 2015 data was incomplete and only limited areas were available for analysis. Nonetheless, as with the 2012 ALS campaign completed by KALC, the available new data from CALI illustrate, confirm and expand upon a range of long-held and well-established assumptions about archaeological landscapes from conventional studies.

Many factors contribute to chronic diseases. Some of these factors are modifiable behaviors; in other words, they reflect individual health behaviors. Half of all deaths Oregon can be attributed to unhealthy lifestyle or modifiable behaviors like tobacco use, sedentary lifestyle, poor diet, and not getting preventive screenings like mammograms or blood cholesterol tests.
