Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

In Galileo's time-- science began using man's most reliable truth detector---- "Repeatable published physical measurements of the thing under study coupled with vigorous technical debate using a common language called mathematics". It works! A popular example of it working is forensic medicine in law enforcement. Compare today with technology with 50 years ago.
