

the skeletal and muscular pdf

The human musculoskeletal system (also known as the locomotor system, and previously the activity system) is an organ system that gives humans the ability to move using their muscular and skeletal systems. The musculoskeletal system provides form, support, stability, and movement to the body. It is made up of the bones of the skeleton, muscles, cartilage, tendons, ligaments, joints, and other ...

Human musculoskeletal system - Wikipedia

Skeletal muscle is one of three major muscle types, apart from cardiac muscle and smooth muscle. It is a form of striated muscle tissue, which is under the voluntary control of the somatic nervous system. Most skeletal muscles are attached to bones by bundles of collagen fibers known as tendons.. Skeletal muscle refers to multiple bundles of cells joined together called muscle fibers. Both are ...
